For additional reference, three other international guidelines may be considered:

- Dubai Health Authority. Dubai Universal Design Code, 2017. Refer to <https://www.dha.gov.ae>
- UAE Federal Law no (4) of 2015 concerning Private Health Facilities

Where one guideline is deemed to be inadequate in the coverage of certain facility types, another guideline may be consulted. It should be noted that following another guideline wholly is not acceptable.

Another guideline can only be followed by exception where the subject is not covered by these guidelines.
